Comprehensive E-Commerce Solution

4over Import

Shopify App

Syncing...

Adding logo...

Do you use Shopify and want to feature the 4over.com catalog? We have made it easy!

Our eSyncer application offers **fast and seamless synchronization** between your Shopify store and the 4over product catalog

- ➔ Comprehensive dashboard
- ➔ File Upload System
- ➔ Order Automation
- ➔ Full Customization
- ➔ Shipping Management

Comprehensive dashboard

- **Easy-to-use product building tool:** Create and upload uniquely tailored products. You may offer every product option, or you can build your site based on the specific options your clients will most likely order (within the scope of 4over offer)
- **Order status tracking:** Comprehensive order tracking interface (this should stand on it's own)

File Upload System

- Built-in system for uploading your customer graphic files directly on product pages
- Detailed logs of all synchronization and order processing activities

Shipping Management

- Direct integration with 4over shipping rates
- Delivery cost calculated on the product page

Order Automation With Your Choice of:

- **Automatic Order Submission:** Instant order transfer to 4over (or)
- **Manual Control Option:** Ability to review and approve each order before sending

Full Customization

- Completely adaptable to your specific business requirements
- Tailored to your store theme and style
- Flexible product and collection management
- Support for EDDM iframe integration
